SUMMARY

Skilled MCA graduate specializing in computer science, proficient in a variety of programming languages and technologies. Holds Master's and Bachelor's degrees in Computer Application. Experienced in HTML, CSS, JavaScript,Java, and Python. Demonstrates strong leadership qualities and effective communication skills

---

EXPERIENCE

Software Developer-Intern *July 2023 -Sept 2023*
Apps Team Technologies

- Utilizing Node.js, a server-side JavaScript runtime, to create and enhance the functionality of the website.
- Designing the structure and organization of the database to efficiently store and retrieve data.
- Developing Application Programming Interfaces (APIs) to enable communication between the website and external services or applications

---

EDUCATION

Master of Computer Application 2021 -2023
Federal Institute of Science and Technology

Bachelor of Computer Application 2017 -2020
College Of Applied Science IHRD

SKILLS

- JavaScript,
- TypeScript
- Java
- C
- C#
- Nodejs
- React
- Express
- Npm
- Git
- MySQL,
- MongoDB
- Python
- HTML
- CSS

PROJECTS

Doctor's Appointment Booking System
Developed a comprehensive doctor's appointment booking system using the MERN stack . This application streamlines the process of scheduling and managing appointments for both patients and doctors.
- Front End: ReactJS
- Back End: NodeJS
- Database: MongoDB

Dream Home
Dream Home is a centralized platform designed to facilitate seamless collaboration and communication among project architects, contractors, interior designers, and clients. It allows all stakeholders to access and share project-related information in real-time, ensuring efficient project management and coordination.
- Front End: ReactJS
- Back End: NodeJS
- Database: MySQL

E-commerce Site
Build an e-commerce platform using Node.js and Express.js. This project provides a foundation for creating an online store with features like product listings, shopping cart functionality, user authentication, and order management.
- Framework: Node.js, Express.js
- Database: SQL

Dawn of the Dead
This is a Zombie game, players need to locate a hospital, gather medicine from it, and deliver it to a patient.

Vegetables
This is a puzzle game. You have to drop a vegetable into a box. If two of the same vegetables touch each other, they'll merge into a larger vegetable.
- Rigidbody2D
- Score System

ACHIEVEMENTS &CERTIFICATIONS

- Participated in "Brute force" conducted by UST Global.
- Took part in a Machine Learning workshop hosted by iDatalytics.
- Udemy Certificate in JavaScript

SOFT SKILLS

- Team Work
- Problem-solving
- Fast Learner
- Analytical
- communication
